Force Presentation

Developing a Force Presentation

You are the J-35 on the staff for USGEOCOM, the 18-country region shown on this map. In this activity, you are being tasked with developing the force presentation for two separate conflicts within USGEOCOM. You will use the knowledge gained in the course material to choose the most appropriate elements from each of the four services to address each situation presented to you.

Mission Statement

In the online activity, you will be presented with two missions. In each mission, you will need to review the description while considering what service forces are best suited to accomplish the mission.

From the service icons on the activity screen, you will open lists of force elements and will select the forces best suited to accomplish the mission. You can work through the services in any order and can see your developing force by selecting the Show Joint Force Presentation button.

Air Force

Build an AETF that can accomplish the mission provided in the activity online from the following element list.

Army
Build a division or corps that can accomplish the mission provided online from the element list below.

Navy
Select the appropriate naval force to accomplish the mission provided online from the element list below.

Marines
Select an appropriate Marine force to accomplish the mission provided online from the element list below.

Element List and Descriptions

Service	Element Name	Element Description
Air Force	F-22A Raptor	Multirole fighter (stealth) aircraft
	F-15E Strike Eagle	Strike fighter aircraft
	F-16 Fighting Falcon	Multirole fighter aircraft
	B-2 Spirit	Multirole bomber (stealth) aircraft
	C-130 Hercules/C-17 Globemaster	Tactical/strategic airlift of personnel and cargo
	KC-135 Stratotanker/KC-10 Extender	Air-to-air refueling and airlift aircraft
	E-3 Sentry (AWACS)	Airborne command and control platform
	MQ-9 Reaper	RPA with ISR and attack capability
	A-10 Thunderbolt	Close air support aircraft
	AC-130H Spectre	Attack aircraft
	MC-130P Combat Shadow	Special operations support aircraft
	E-8 JSTARS	Ground ISR and C2 aircraft
	Space Based Infrared System High	ISR satellite
	Falconer Air and Space Operations Center	Operational-level command and control system for air operations
	Tactical Air Control Party	USAF advisory team to Army or SOF units
Army	Heavy Brigade Combat Team	Armored unit capable of offensive and defensive operations
	Stryker Brigade Combat Team	Mechanized infantry-based unit capable of mobile offensive and defensive operations
	Infantry Brigade Combat Team	Infantry-based unit capable of offensive and defensive operations
	Infantry BCT with air assault assets	IBCT with rapid response and forced entry capability via rotary wing aircraft able to conduct deep fires and maneuver
	Infantry BCT with	IBCT with rapid response and forced entry capability via

	airborne capability	parachute insertion
Navy	Expeditionary Strike Force	Grouping of CSGs and ESGs capable of air strike and amphibious missions
	Expeditionary Strike Group	Grouping of amphibious ships and surface combatants (LHA/LHD, LPD, LSD, DDG, CG, SSN) capable of large-scale amphibious operations and strike missions
	Carrier Strike Group	Grouping of carrier with surface combatants (CVN, CG, DDG, SSN, TAO) capable of air and surface strike missions
	Amphibious Ready Group	Pairing of amphibious ships (LHA/LHD, LPD, LSD) and an MEU capable of amphibious operations
	Surface Action Group	Two or more surface combatants (DDG/CG) capable of ASW/ASUW/AAW
	Guided Missile Submarine	Strike and special operations submarine
	Fast Attack Submarine	ASW/ASUW/ISR submarine
Marine	Marine Expeditionary Force	MAGTF capable of deploying en masse or in parts (~ 20,000 to 90,000 Marines)
	Marine Expeditionary Brigade (Amphibious)	MAGTF deployed via naval amphibious ships (~ 16,000 sailors and Marines)
	Marine Expeditionary Brigade (Maritime Pre-Positioning Force)	MAGTF deployed via sealift or airlift and married to MPF (~ 16,000 sailors and Marines)
	Marine Expeditionary Unit	MAGTF that is forward deployed and part of the Fleet Marine Force (~ 2,200 Marines)
	Special Purpose Marine Air Ground Task Force	MAGTF tailored for unique missions of limited duration (< 2,200 Marines)

Review

In this activity, you had an opportunity to select service capabilities for an application in a joint environment with a focus on force presentation. The concepts you learned—service capabilities and limitations and force presentation principles—are central to the application of military force in joint operations. Consider these foundational elements as you move through this and future “joint” courses.
